Learning Outcomes

Code	Number	Description
MLO1	1	Find and evaluate information related to selected topical issues in Psychology & Health
MLO2	2	Present a piece of writing in an academic style
MLO3	3	Reflect on their personal development as an independent learner
MLO4	4	Apply basic IT software by producing an online blog

Module Content

Outline Syllabus	The syllabus will build academic skills week by week, taking students through the process of finding information, using that information and communicating it to others in both written and oral form. The module will also cover other academic skills such as personal development planning, time management and organisation, target setting, and using feedback. Students will develop their team working skills through group activities in workshops. Digital literacy and IT skills will be enhanced through workshops, on-line activities and the creation of a reflective blog.
Module Overview	The aim of this module is to facilitate the development of personal, academic and professional skills as a foundation for current and future studies. You will learn the tools to become a confident and independent learner at university, covering a selection of topical subjects in psychology and health.
Additional Information	This Level 3 skills module will enable the development of independent and deductive learning and the growth of self-efficacy.
