Teaching Responsibility

LJMU Schools involved in Delivery
Psychology

Learning Methods

Learning Method Type	Hours
----------------------	-------

Lecture	11
Tutorial	6
Workshop	22

Module Offering(s)

Offering Code	Location	Start Month	Duration
JAN-CTY	CTY	January	12 Weeks

Aims and Outcomes

Aims	1. To facilitate the development of research and data skills as a foundation for students' current and future studies.2. To prepare students to apply scientific approaches to solve problems.3. To prepare students to think ethically about conducting research.
-------------	--

Learning Outcomes

After completing the module the student should be able to:

Code	Description
MLO1	Summarise scientific research on a selected topical issue within Psychology & Health
MLO2	Explain methodological and ethical considerations in relation to addressing a research question
MLO3	Present data in graphical and tabular formats
MLO4	Discuss conclusions drawn from research data
MLO5	Present a basic study in a lab report format

Module Content

Outline Syllabus
The syllabus will build on the general academic skills taught in Skills & Perspectives 1. Lectures will introduce students to different methods used within Psychology & Health research, including both quantitative and qualitative approaches. These methods will be examined in more detail, and in some cases actively experienced, in the workshops. Students will undertake practical work in the workshops. Students will learn to enter and display data in software packages such as Excel and SPSS. Tutorials in smaller groups will focus on personal development planning and general academic skills such as writing and critical thinking.

Module Overview

This module will facilitate the development of research and data skills as a foundation for your current and future studies to prepare you to apply scientific approaches to solve problems. It will also prepare you to think ethically about conducting research.

Additional Information

This module provides students will basic skills in research methods and statistics as a foundation for Level 4 study.
