Delivery Options

Course typically offered: Semester 2

Component	Contact Hours
Lecture	20.000
Tutorial	10.000

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	AS1	2,500 word essay	100.0	

Aims

The aim of this module is to provide the student with the opportunity to develop knowledge and understanding of the complex settings in which primary and intermediate care are delivered. The module facilitates this using a public health approach.

Learning Outcomes

After completing the module the student should be able to:

- 1 Discuss the provision of social care and health care in the community, taking into account a range of factors that affect the experience of health and care delivery.
- 2 Examine the role of the nurse in the assessment, planning, management and evaluation of health and social care within primary and intermediate care settings.
- 3 Discuss the importance in practice of the meaning of health and health needs as expressed by individuals, families and communities experiencing health challenges.
- 4 Discuss the role of the nurse working within a framework of multi-disciplinary public health practice.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Discussive Essay 1 2 3 4

Outline Syllabus

Determinants of health. Demography. Social exclusion. The concept of diversity. Equity. Advocacy. The public health model of primary care. Public health approaches in practice. Notes

The module offers the student the opportunity to explore issues influencing out of

hospital care practice from a range of perspectives and using a public health approach as the basis for this.
