Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Report	AS1	2000 word annotated bibliography.	100	

Aims

To introduce the student to the research process and the concept of evidence based midwifery practice. To develop personal study skills.

Learning Outcomes

After completing the module the student should be able to:

- 1 Identify how research underpins midwifery practice.
- 2 To understand how research evidence supports personal study skills.
- 3 Discuss basic concepts of the research process.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

REPORT	1	2	3
--------	---	---	---

Outline Syllabus

Research process, sources of evidence, study skills, literature searches, legal and ethical considerations, referencing styles, frameworks for critiquing research articles, portfolio design.

Learning Activities

Lectures, discussions, seminars, presentations, e-learning.

Students will be formatively assessed throughout this module and specifically by: a small group work task on qualitative/quantitative research, research terminology individual task.

Notes

This module will enable the students to gain an awareness of the research process and how evidence based midwifery practice can benefit the woman, baby and family. Students will provide evidence of their development of learning styles.

This module assessment requires 40% minimum to pass the module.
