Graeme Mitchell	Y

**Academic Level:** FHEQ4      **Credit Value:** 20      **Total Delivered Hours:** 48

**Total Learning Hours:** 200      **Private Study:** 152

### Delivery Options

Course typically offered: Semester 2

Component	Contact Hours
Lecture	24
Practical	24

**Grading Basis:** 40 %

### Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Report	ASS1	group report 2,500 words	60	
Reflection	ASS2	personal reflection 2000 words	40	

### Aims

*To provide students with an insight into the practical skills that are necessary as they begin their course and as they progress through their programme of study and into a career in Public and Environmental Health.*

### Learning Outcomes

After completing the module the student should be able to:

- 1 Identify the range of practical skills relevant to public and environmental health
- 2 Consider this range of practical skills and why they are important for Public and Environmental Health
- 3 Demonstrate a level of competence in the practical application of these skills

### **Learning Outcomes of Assessments**

The assessment item list is assessed via the learning outcomes listed:

2500 word group report	1	3
2000 words personal reflection	2	

### **Outline Syllabus**

*The module will cover the range of practical skills that are relevant to Public and Environmental Health. It will cover areas such as data handling and interpretation; collection, recording and dissemination of information; observation, negotiation; persuasion; infographics; communication, group collaboration, project development, working with others.*

*The module will consider the theory behind these practical skills, as well as their application.*

### **Learning Activities**

Interactive lectures and presentations, guided reading, student led discussions and Canvas. Student will also engage in a number of practical skills sessions

### **Notes**

This module looks to introduce students to a range of practical skills that will be useful for a career in Public Health or Environmental Health. The module blends both taught and practice elements together to enable students to have not only an understanding of why these skills are important but the opportunity to practice them
