

## Liverpool John Moores University

Title: 2D AND 3D ANIMATION  
Status: Definitive  
Code: **4027IMEDIA** (119020)  
Version Start Date: 01-08-2012

Owning School/Faculty: Liverpool Screen School  
Teaching School/Faculty: Liverpool Screen School

Team	Leader
Ian Bradley	Y
Mark Smith	
Sarah Haynes	

**Academic Level:** FHEQ4      **Credit Value:** 24.00      **Total Delivered Hours:** 72.00  
**Total Learning Hours:** 240      **Private Study:** 168

### Delivery Options

Course typically offered: Standard Year Long

Component	Contact Hours
Lecture	5.000
Tutorial	7.000
Workshop	60.000

**Grading Basis:** 40 %

### Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Practice	PRACTICAL		75.0	
Reflection	REFLECTION		25.0	

### Aims

1. To provide students with the opportunity to develop basic (introductory) technical skills within 2D and 3D environments.
2. To encourage the exploration of the 2D and 3D environments through the creation and manipulation of elements within this space.
3. To begin to develop an animator's mind-set. (Spatial awareness, timelessness,

2D/3D virtual space)

## Learning Outcomes

After completing the module the student should be able to:

- 1 Demonstrate technical and creative competence in employing the relevant hardware and software tools required to create 2D and 3D animated sequences.
- 2 State contemporary approaches to technique and distribution of animation artefacts.
- 3 Critically evaluate your project in reference to past and contemporary theory and practice of animation

## Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

PRACTICAL	1	2	3
REFLECTION	3		

## Outline Syllabus

*Explore a variety of animation styles and techniques including: Flash animation, 3D practical techniques, Character Design, Modelling, Texturing, Basic Lighting Techniques, Simple Camera Techniques and Rendering Options*

## Learning Activities

Module delivered through combination of lectures, workshops and tutorials, underpinned by short exercises. Students will undertake group critiques and independent research.

## Notes

This is a level 1 module, and as such it is expected that students will be starting the module with a range of computer and animation experience spanning from none at all to some knowledge of animation software. Some students will have better developed spatial understanding and awareness skills and it should be noted that the aim is to be inclusive of all students regardless of their level. Struggling students can easily be put off by complex software packages. This module aims to provide a non-threatening grounding in 2D and 3D, allowing students time to get used to new concepts and ways of thinking, which they will then develop further in level 2.

The module is designed to be a basic introduction to the concepts and mind-set of 2D animation and virtual 3D worlds. Using a combination of tutorials and project work, students can be encouraged to move at their own pace and level.
