Theoretical instruction a. Nursing: Nature and ethics of the profession General principles of health and nursing Nursing principles in relation to: general and specialist medicine general and specialist surgery child care and paediatrics maternity care mental health and psychiatry
Module Overview	This module helps you to build upon practice experiences from Introduction to Practice 1. It will further introduce you to a range of values, attitudes and skills that underpin safe and effective clinical practice. You will participate in guided care, conduct nursing care, and enhance your knowledge and skills relevant to medicines management, all to the required NMC standards.
Additional Information	The Academic Assessor will monitor that the student has completed 337.5 practice hours. This includes any practice placement learning and simulated practice learning, in accordance with the students programme plan. These hours are not included in the total module hours but are noted within the module proforma for university monitoring and progression purposes. In addition to the contact hours above there are 160 private study hours. 100 hours are guided, this includes online and assessment preparation. Online hours are e-learning. 60 hours are independent study. Please note that workshop hours as listed in the above contact hours account for simulated theoretical learning, in accordance with NMC standard 3.4
