Outline Syllabus

The aim of the module is to introduce students to the basic elements of contemporary Fine Art practice, and to begin to evolve an understanding through experimentation, and exploration and research of current issues in Fine Art. This will enable students to build and contextualise theoretical methodologies surrounding their own work with relationship to the contemporary art world. This Module will also introduce you to the Cultural and Artistic Infrastructure of the City, Flexible Working/Shared Studio Practice, Working in the Public Domain, Backboard, Tutorials and Assessment by Review.

Learning Activities

A programme of studio and city-wide based team and individual activity supported by lectures and opportunities for critical debate. The module is further supported by an introduction to basic skills and workshop orientations that will facilitate independent and self-directed practice.

Notes

This Module will enable all level 4 students to explore ideas in the widest possible framework, and to allow an equality of experience to develop. This will be supported through an intensive programme of lectures, seminars, tutorials, workshops, and critiques. This Module will also introduce students to the role that collaborative working plays in the development of ideas and the presentation of those ideas as proposals for making/negotiating the realisation of individual practices.
