Aims and Outcomes

Aims	Public Law is basically concerned with the law and politics governing the relations between the various institutions of the UK State, such as Parliament, the judiciary and the Government. It also examines the relations, legal and otherwise between the citizen and the State. It examines notions of constitutionalism and enquires into how we can speak of Constitutional law in the UK by reference to principles such as Parliamentary Sovereignty and the Rule of Law. It then investigates how the Government, or Executive, administers the UK State and also considers the effect this has on us as individual citizens and considers the differing methods, political, administrative and legal, of holding the Executive to account.
