

Summary Information

Module Code	4104MW
Formal Module Title	Research and Study Skills
Owning School	Nursing and Allied Health
Career	Undergraduate
Credits	20
Academic level	FHEQ Level 4
Grading Schema	40

Module Contacts

Module Leader

Contact Name	Applies to all offerings	Offerings
Michelle Beacock	Yes	N/A

Module Team Member

Contact Name	Applies to all offerings	Offerings
--------------	--------------------------	-----------

Partner Module Team

Contact Name	Applies to all offerings	Offerings

Teaching Responsibility

LJMU Schools involved in Delivery
Nursing and Allied Health

Learning Methods

Learning Method Type	Hours
----------------------	-------

Lecture	18
Online	6
Seminar	10
Tutorial	6

Module Offering(s)

Offering Code	Location	Start Month	Duration
SEP-CTY	CTY	September	28 Weeks

Aims and Outcomes

Aims	To develop the student's personal study skills, and relate these to the research process. To introduce the student to the concept of evidence, application of evidence practice, and develop a basic understanding of the nature and processes of research.
-------------	---

Learning Outcomes

After completing the module the student should be able to:

Code	Description
MLO1	Develop a broad range of study skills, which can be utilised in academic and professional practice.
MLO2	Understand how evidence and research underpins and supports the development of personal study skills.
MLO3	Discuss essential concepts of the research process.
MLO4	Evaluate evidence use.
MLO5	Identify how research influences and underpins midwifery practice.
MLO6	Identify and reflect upon the following aspects of self-awareness in respect of personal development: strengths and weaknesses, motivations, values and ability to work with others.

Module Content

Outline Syllabus
Introduction to: Research terminology, use of critiquing frameworks, qualitative research, quantitative research, mixed methods research, alternative research methods, sampling and recruitment, methods of collecting evidence, research paradigms, research ethics, evidence based practice, data analysis, dissemination.

Module Overview

This module will develop your personal study skills and relate these to the research process. You will be introduced to the concept of evidence, the application of evidence practice, and you will develop a basic understanding of the nature and processes of research.

Additional Information

This module will enable the students to recognise and develop individual learning styles and study skills, to support academic progression. It will facilitate students to gain an awareness and understanding of the research process. Students will be introduced to the concept of evidence based practice, and how research can influence care in practice for mothers, babies and families.

Assessments

Assignment Category	Assessment Name	Weight	Exam/Test Length (hours)	Learning Outcome Mapping
Report	3000 words	90	0	MLO2, MLO5, MLO1, MLO3, MLO4, MLO6
Future Focus e-learning task	Reflection	10	0	MLO1, MLO6
