Aims

The aim of this module is to draw together learning in the other programme modules and apply skills and understanding to the specifics of a live project. All the features of the module are designed to simulate or recreate professional working conditions or circumstances.

Learning Outcomes

After completing the module the student should be able to:

- 1 Plan and propose a creative project.
- 2 Collaborate with other arts practitioners to realise a creative project and engage an audience.
- 3 Utilise professional skills to realise a creative project.
- 4 Devise strategies for the use of technology in creative planning and use technology in the realisation of a creative project.
- 5 Reflect on practice and plan for future projects.
- 6 Describe how learning from a previous project has been applied in new work.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Proposal and Project Plan	1					
Project + Personal Reflection	2	3	4	5	6	

Outline Syllabus

The students will produce the equivalent of a funding application or business proposal where an idea will be clearly presented in project planning terms and be justified with reference to appropriate understanding of the art form and its traditions and its value and impact in the real world (see Core Ideas module). They will be expected to apply skills developed in the pathway modules. The project evaluation would include reference to key ideas covered in the course.

Learning Activities

This module will be a full professionally simulated project and as such students will work full time in conjunction with a professional artistic mentor and projects will be overseen by a tutor using rehearsal or preparation feedback sessions and supervision tutorials. The project period will typically last five weeks.
