

Liverpool John Moores University

Title: Work Based Learning (Operational)
Status: Definitive
Code: **4553BFC** (121552)
Version Start Date: 01-08-2020

Owning School/Faculty: Engineering
Teaching School/Faculty: Blackpool & Fylde College

Team	Leader
Barbara Kelly	Y

Academic Level: FHEQ4
Credit Value: 20
Total Delivered Hours: 100
Total Learning Hours: 200
Private Study: 100

Delivery Options

Course typically offered: Semester 2

Component	Contact Hours
Placement	82
Tutorial	18

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Report	Report	Shipboard Operations (4500 words)	100	

Aims

This module aims to develop skills in application of knowledge to practical situations, and analysis of the results. Through this module, the transition from academic study to shipboard work is promoted through application, analysis, evaluation and reflection.

Learning Outcomes

After completing the module the student should be able to:

- 1 Analyse the purpose, process and outcome of a shipboard operation.
- 2 Plan and conduct a shipboard operation.
- 3 Evaluate roles and responsibilities of those involved in a shipboard operation.
- 4 Reflect on the effectiveness of a shipboard operation and identify personal actions for future improvement.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Shipboard Operations	1	2	3	4
----------------------	---	---	---	---

Outline Syllabus

Note that syllabus items for all FD topics related to shipboard operations will be relevant.

Project planning and time management

Application of underpinning knowledge

Analysis of operations in terms of purpose, process and outcome

Evaluation of personal performance

Evaluation of roles and responsibilities

Reflective writing

Learning Activities

The WBL (operational) module will be completed by students during their sea phases with the support of a designated WBL module leader at college and materials made available electronically. Learning activities across the whole of the programme feed into the WBL project through specific concepts and underpinning knowledge.

Briefings before departure for the sea phase will allow basic guidance to be given, examples to be studied, and initial questions to be addressed.

The final projects will be marked, and feedback will have an emphasis on improvements for WBL (managerial).

Notes

This module can contribute to the underpinning knowledge required for progression to an Officer of the Watch professional qualification. The work placement can be completed in an alternate environment to a ship based placement following discussion with the programme leader.
