John McLoughlin	Y

Academic Level: FHEQ5
Credit Value: 12.00
Total Delivered Hours: 42.00
Total Learning Hours: 120
Private Study: 78

Delivery Options

Course typically offered: Semester 1

Component	Contact Hours
Lecture	24.000
Off Site	2.000
Seminar	2.000
Tutorial	10.000
Workshop	2.000

Grading Basis: BTEC

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Exam	AS1	closed book	50.0	2.00
Report	AS2	assignment	50.0	

Aims

To give students the knowledge and skills to identify hazards and assess risks and then to make recommendations about managing those risks all in the context of the construction industry.

To give the students an understanding of the main Health and Safety legislation pertaining to construction and property sectors.

Learning Outcomes

After completing the module the student should be able to:

- 1 Identify the main HSW legislation.
- 2 Identify the main requirements of H&S policy and the necessary implementation organisation.
- 3 Discuss hazard identification and risk management.
- 4 Undertake risk assessment and formulate management measures.
- 5 Review and revise assessments.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

EXAM	3	4	5
REPORT	1	2	

Outline Syllabus

Main HSW legislation.

Policy and organisational arrangements.

Hazard identification and risk management.

Learning Activities

The module will be case study based and will involve a number of teaching approaches including lectures, tutorials, seminars, workshops, AVA presentations and visits to construction sites and design offices.
