

Food safety

Module Information

2022.01, Approved

Summary Information

Module Code	5001ENVCPH
Formal Module Title	Food safety
Owning School	Public Health Institute
Career	Undergraduate
Credits	20
Academic level	FHEQ Level 5
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
Public Health Institute

Learning Methods

Learning Method Type	Hours
Lecture	48

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
SEP-CTY	CTY	September	12 Weeks

Aims and Outcomes

Aims	To engage students in a critical exploration of current issues in the interface between environmental problems, safety of food, its production and consumption in relation to human health.
------	---

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Explore the relationships that exist between the environment, food production and consumption, and human health.
MLO2	2	Interpret and apply food safety legislation, including codes of practice, policies and strategies at European and National levels.
MLO3	3	Appraise the layout and design of food processing systems and premises

Module Content

Outline Syllabus	Identify biological, chemical and physical stressors in relation to hygiene, food production and consumption; inspection techniques; layout and design of food premises, interpretation and enforcement of food safety legislation; HACCP; relationship between environment, food and health; farm to fork; food standards legislation
Module Overview	This module will engage you in a critical exploration of current issues in the interface between environmental problems, safety of food, and its production and consumption in relation to human health. Food hygiene and safety are examined, alongside risks to public health from food contamination. You will also examine the roles of the Environmental Health Practitioner and other organisations involved in food safety, both nationally and internationally.
Additional Information	In this module food hygiene and safety are examined. The risks to public health from food contamination are explored. The roles of the Environmental Health Practitioner and other organisations involved in food safety, both nationally and internationally are analysed.
