

Summary Information

Module Code	5002ENVCPH
Formal Module Title	Environmental protection
Owning School	Public Health Institute
Career	Undergraduate
Credits	20
Academic level	FHEQ Level 5
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
Public Health Institute

Learning Methods

Learning Method Type	Hours
Lecture	48

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
SEP-CTY	CTY	September	12 Weeks

Aims and Outcomes

Aims	To provide students with the relevant skills to identify, select and assess the effectiveness of a range of environmental health interventions and enforcement options within the key Environmental Health areas of environmental protection.
------	---

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Interpret the relevant legislation, including codes of practice, policies and strategies at National and European level.
MLO2	2	Assess the factors which influence the implementation, investigation and enforcement of environmental protection interventions
MLO3	3	Identify the key principles associated with environmental protection

Module Content

Outline Syllabus	Introduction to the underlying principles of environmental hazards and risks including the range of biological, chemical, physical social and psychological stressors that may act upon the physical, social and human worlds. The quantification, assessment and management of stressors within areas of Environmental Public Health Government policies and statutory instruments for health protection, including an understanding of their impacts on the environment and human health.
Module Overview	This module provides you with the relevant skills to identify, select and assess the effectiveness of a range of environmental health interventions and enforcement options within the key Environmental Health areas of environmental protection. Health protection aims to anticipate chemical, physical and social hazards and develop interventions to protect the public's health. Environmental health practitioners are involved in the practice of these approaches and you will explore how these approaches are used and evaluate their effectiveness.
Additional Information	Health protection aims to anticipate chemical, physical and social hazards and develop interventions to protect the public's health. Environmental health practitioners are involved in the practice of these approaches and we will explore how these approaches are used and evaluate their effectiveness.

Assessments
