Aims

To allow the student to examine the concept of inclusiveness in relation to their own

professional practice and the organisational context within which they work.

Learning Outcomes

After completing the module the student should be able to:

- 1 Evaluate the concept of inclusiveness and the use of legislation and professional codes in its promotion.
- 2 Analyse and evaluate their own professional practice to recognise possible barriers to and opportunities for practice that promotes inclusion.
- 3 Analyse organisational structures and policies within their own workplace and their effects on inclusion.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Essay	1	3
Personal reflection	2	

Outline Syllabus

Contemporary social policy for inclusiveness, and its historical context. Current legislation such as SENDA and the Code of Practice. Equal opportunities, anti-oppressive practice, stereotypes and discrimination. Special needs. The debate surrounding integration and inclusiveness. Changes in terminology and the evolution of language in relation to inclusive practice. Supporting children and young people with English as an additional language. Resourcing inclusive practice.

Learning Activities

Students will participate in lectures, workshops, critical discussions & reflections, small group tutorials and work based activities. A SENCO or other guest speaker is invited to a discussion session and an initial inclusiveness audit is carried out in the setting to be used as a reflective tool. Students prepare for, and participate in, a debate on integration/inclusion.

Notes

The module allows students to reflect critically and sensitively on workplace practice and ethos as well as their own personal attitudes and professional practice surrounding inclusion. The module is designed to recognise the evolving nature of the concept of inclusion and how it relates to inclusive practice. Current practitioners (e.g. SENCOs) are used to support the delivery of this module, thus ensuring currency.
