Academic Level: FHEQ5 **Credit Value:** 24 **Total Delivered Hours:** 48
Total Learning Hours: 240 **Private Study:** 192

Delivery Options

Course typically offered: Standard Year Long

Component	Contact Hours
Practical	6
Workshop	42

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Practice	PAR		100	

Aims

To develop the skills required to provide care to women with complex intranatal needs

Learning Outcomes

After completing the module the student should be able to:

- 1 Determine the impact of the medicalisation of childbirth during the peri-intranatal period
- 2 Recognise deviations from normal physiological childbirth and initiate appropriate action
- 3 Critically evaluate how the provision of normal midwifery care can support the woman with complex needs during the intranatal period

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Practice Assessment Record	1	2	3
----------------------------	---	---	---

Outline Syllabus

Malpresentations, malpositions, induction and augmentation of labour, premature labour and birth, prolonged and obstructed labour, operative delivery, role of the scrub midwife, multiple births, perineal suturing, instrumental delivery, maternal and fetal monitoring, APH, PPH, sepsis, PROM, PPRM, Supervision of Midwifery and support in complex birth, MEOWS, pre and post operative care

Learning Activities

Practice, workshops, reflection, discussion, simulation, and scenarios, formative film recorded scenarios with peer feedback

Notes

This practice module will develop the skills and knowledge acquired for safe and effective midwifery practice in complex care. The module will focus on the recognition, initial midwifery management, referral and partnership working. This module builds upon the theory and practice provided in MIDWIF5000 and MIDWIF5001.
