SEP-CTY	CTY	September	12 Weeks

Aims and Outcomes

Aims	To provide students with the relevant skills to identify, select and assess the effectiveness of a range of health interventions and enforcement options within the key public health area of health protection.
------	--

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Interpret the relevant legislation, including codes of practice, policies and strategies at National and European level.
MLO2	2	Assess the factors which influence the implementation, investigation and enforcement of health protection interventions.
MLO3	3	Identify the key principles associated with health protection.

Module Content

Outline Syllabus	Introduction to the underlying principles of public health hazards and risks including the range of biological, chemical, physical, social and psychological stressors that may act upon the physical, social and human worlds. The quantification, assessment and management of stressors within areas of public health government policies and statutory instruments for health protection, including an understanding of their impacts on the environment and human health.
Module Overview	This module provides you with the relevant skills to identify, select and assess the effectiveness of a range of health interventions and enforcement options within the key public health area of health protection. Health protection aims to anticipate chemical, physical and social hazards and develop interventions to protect the health of the public. We will explore different approaches to the development of interventions, how they are used and how to evaluate their effectiveness.
Additional Information	Health protection aims to anticipate chemical, physical and social hazards and develop interventions to protect the health of the public. We will explore different approaches to the development of interventions, how they are used and how to evaluate their effectiveness.
