#### Aims and Outcomes

Aims	After this module is completed students will be able to explore health from an international viewpoint, focusing on low and middle-income countries and understand the challenges of health and health care in context of resource poor nations.
------	--

**After completing the module the student should be able to:**

### Learning Outcomes

Code	Number	Description
MLO1	1	Examine contemporary health matters effecting people in the poorer regions of the world.
MLO2	2	Analyse a range of causative factors that may contribute to ill health in low and middle income countries.
MLO3	3	Analyse preventions and interventions associated with ill health in the poorer regions of the world.
MLO4	4	Apply the underlying concepts associated with health to international contexts.

### Module Content

Outline Syllabus	Globalisation and its impact upon health; the interconnectedness of developed/developing countries Effects of economic, trade, cultural and sustainability influences upon global health Epidemiology and political science and how they help us understand global health Case studies examining issues such as nutrition, provision of medication, HIV, epidemics, child labour and sexual/reproductive health Health promotion/public health services, role of health and other professionals in the promotion of health in international contexts
Module Overview	This module allows you to develop your knowledge on health from an international viewpoint, focusing on low and middle-income countries and understand the challenges of health and health care in context of resource poor nations.
Additional Information	This module allows the student to develop their knowledge of the factors affecting the health of individuals, families and communities in societies outside the UK. The portfolio will allow students to receive formative feedback until they submit the completed portfolio, before submitting the case study
