Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	Essay	4500 word essay which will include a consideration of pain assessment and interventions and ethical considerations underpinning the care.	100	

Aims

To explore contemporary issues and strategies for managing the needs of the child and their family across a range of conditions and clinical settings.

Learning Outcomes

After completing the module the student should be able to:

- 1 Analyse the effects of illness and hospitalisation on children, young people and their families
- 2 Analyse pain assessment and interventions in children within a variety of settings and demonstrate knowledge of appropriate use of pain relief measures.
- 3 Apply knowledge of normal/abnormal physiological, psychological and social development of the child within a variety of settings.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Essay	1	2	3
-------	---	---	---

Outline Syllabus

Child and Family centred care.

Children's involvement in decision making.

Communication with children and families.

Assessing the well child.

Factors that influence child health. Genetics. Child development theories and principles. Adolescent development.

Monitoring and Assessing development. Causes of common health conditions, Best practice, Symptom management, and risk management.

Death & dying.

Public health

Disability awareness - assessment of children with special needs.

Affect on siblings.

Pain assessment and management of pain.

Learning Activities

Tutorials, seminars, web based activities, role play, scenario based learning, use of Paediatric Early Warning Systems (PEWS), enquiry based learning and quiz activities.

Notes

This module will focus on contemporary issues that children, young people and their families and carers

may experience and will examine the underpinning political frameworks. This will include utilising external experts, including a pain team, which actively support

students along with their mentors, bringing in evidence based practice and a child and young persons pain forum, which supports the theory within this module.
