Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	Care plan	written assignment 4,500 words This essay will explore the impact on the child/young person and their family – physical and mental health. This essay must include the pain assessment and interventions. This essay will discuss the ethical considerations underpinning the care.	100	1

Aims

To develop an understanding of the needs of the child and their family across a range of conditions and clinical settings.

Learning Outcomes

After completing the module the student should be able to:

- 1 Analyse the effects of illness and hospitalisation on children, young people and their families
- 2 Analyse pain assessment and interventions in children within a variety of settings and demonstrate knowledge of appropriate use of pain relief measures.
- 3 Apply knowledge of normal / abnormal physiological, psychological and social development of the child within a variety of care settings.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Analysis of a care plan 1 2 3

Outline Syllabus

Child and Family centred care.

Children's involvement in decision making.

Communication with children and families.

Assessing the well child.

Factors that influence child health. Genetics. Child development theories and principles. Adolescent development.

Monitoring and Assessing development. Causes of common health conditions, Best practice, Symptom management, and risk management.

Death & dying.

Ethical considerations.

Development of mental health issues.

Alcohol and drug abuse in children and young people.

Public health

Disability awareness - assessment of children with special needs.

Affect on siblings.

Pain assessment and management of pain.

Learning Activities

Tutorials, seminars, web based activities, role play, scenario based learning, use of Paediatric Early Warning System (PEWS), enquiry based learning and quiz activities.

Notes

The placement area has a Pain Team, which actively support students along with their Mentors, bringing in evidence based practice and a child and young persons pain forum, which support the theory within this module.
