Aims and Outcomes

Aims	To provide knowledge of various mobile and web platforms and architectures and gain experience in designing and developing mobile and web applications.

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Critically review mobile-first web application architecture.
MLO2	2	Apply enterprise-scale application design methodologies.
MLO3	3	Consider frameworks for the design and development of web applications.
MLO4	4	Construct data-driven applications for mobile platforms.

Module Content

Outline Syllabus	Desktop vs Mobile-first design Responsive design Declarative layout/control frameworks Database connectivity/SQL-driven web development Web service connectivity Thin vs Thic clients Native mobile development and cross-platform implementations Logical and Physica Architectures	
Module Overview		
Additional Information	This module is intended to provide an overview of developing web applications for mobile platforms. It will illustrate the main platforms available for mobile-focused web development, drawing data from a variety of sources including other web services and databases. The module will conclude with an overview of alternative mobile development techniques; familiarising the student with the fundamentals of native focused and cross-platform frameworks-focused mobile developments.
