Status: Definitive
Code: **5026PQHEAL** (112345)
Version Start Date: 01-08-2014

Owning School/Faculty: Nursing and Allied Health
Teaching School/Faculty: Nursing and Allied Health

Team	Leader
Petrina Glassbrook	Y

Academic Level: FHEQ5 **Credit Value:** 15.00 **Total Delivered Hours:** 30.00
Total Learning Hours: 150 **Private Study:** 120

Delivery Options

Course typically offered: Runs Twice - S1 & S2

Component	Contact Hours
Lecture	17.000
Online	8.000
Seminar	4.000
Tutorial	1.000

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	AS1	3000 word case study	100.0	

Aims

The course is designed to enable all individuals involved in the care of people with diabetes to extend their knowledge, skills and understanding of the health and social problems experienced by people with diabetes in a hospital and community setting.

Learning Outcomes

After completing the module the student should be able to:

- 1 Demonstrate an understanding of how altered physiology affects blood glucose metabolism and precipitates other physiological responses.
- 2 Discuss the care received by people with diabetes
- 3 Demonstrate an understanding of the methods and implications of continued 'monitoring' by the client and health care agencies
- 4 Illustrate an awareness of social and behavioural factors that influence the client's self management of their diabetes.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

ESSAY	1	2	3	4
-------	---	---	---	---

Outline Syllabus

anatomy and physiology
aetiology
pathophysiology
children with diabetes
adults with diabetes
elderly with diabetes
pregnancy and diabetes
treatment regimens
management of associated complications
ethical issues
diet
pharmacology
health beliefs systems
health education / promotion
monitoring
study skills
model of change
Diabetes NSF [2003]
concept of empowerment

Learning Activities

Lectures
Tutorials
Seminars
Reflective Diary
Observational Clinical Visits

Notes

This module aims to provide a broad introduction to the concepts and principles which underpin the care and management of people with diabetes. In doing so it incorporates all the core dimensions of the NHS Knowledge and Skills Framework [NHS KSF]
