Category	Short Description	Description	Weighting (%)	Exam Duration
Exam	AS2	Numerical and essay type questions	75.0	2.00
Test	AS1	Piece of written work in groups of 2	25.0	

Aims

This module is designed to consider the objectives of the firm and how these are translated into decision making tools. The module also aims to provide an understanding of the investment appraisal activity with the firm. The module will also examine how firms cope with financial risk.

Learning Outcomes

After completing the module the student should be able to:

- 1 Indicate the major objectives of the financial manager.
- 2 Use relevant financial data to calculate the cost of capital
- 3 Analyse investment decisions using discounted cash flow models.
- 4 Analyse risk from a utility theory perspective.
- 5 Demonstrate the role of portfolio theory in assessing risk.
- 6 Evaluate the role of the Capital Asset Pricing Model in pricing risk.
- 7 Recognise the implications of the Efficient Markets Hypothesis.
- 8 Demonstrate an ability to present your ideas in writing as part of a team.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

EXAM	1	2	3	4	5	6	7	
Test	1	2	3	4	5	6	7	8

Notes

This module develops skills in investment appraisal and risk through consideration of appropriate models.

The coursework provides an opportunity for formative feedback; the examination is the terminal summative assessment.
