Aims

To enable students to develop the skills required to practice as a professional engineer. This module provides a broad range of experiences including laboratory's and report writing skills required of a professional engineer.

Learning Outcomes

After completing the module the student should be able to:

- 1 Carry out a laboratory experiment, collect notes and data, and write a professional report
- 2 To conduct engineering activities in a professional manner
- 3 Research a topic, find relevant literature and produce a critical review

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Experimental Practice	1	2
Literature Review	3	

Outline Syllabus

The list below provides an indicative list of topics which may be covered in this module:

Experimental Practice

- *Complete a set of laboratory experiments*
- *Observation, measurement and recording of experimental results*
- *Data Handling*
- *Presenting and reporting of results*
- *Professional Development*

Research Methods

- *Research & Library Skills*
- *Report Writing*
- *Critical Thinking*

Learning Activities

A series of lectures, practical's (in the form of laboratory experiments) and tutorials.

Notes

Students must complete the assessment exercises to a satisfactory standard in order to achieve a pass grade in this module.
