

Design 6: Building in the city; enriching urban form through architecture

Module Information

2022.01, Approved

Summary Information

Module Code	5122ARC
Formal Module Title	Design 6: Building in the city; enriching urban form through architecture
Owning School	Liverpool School of Art & Design
Career	Undergraduate
Credits	20
Academic level	FHEQ Level 5
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
Liverpool School of Art & Design

Learning Methods

Learning Method Type	Hours
Lecture	19
Seminar	14
Tutorial	21
Workshop	6

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
SEP-MTP	MTP	September	12 Weeks

Aims and Outcomes

Aims	This module aims to develop students' ability to individually produce a building design which is derived from an urban strategy and that reinforces public spaces, such as streets and squares, within a city district. The module also aims to develop students' graphic skills to show building proposal in an urban context as well as strategies for sustainable environmental design.
------	--

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Develop an architectural design that responds to existing and proposed communities and urban context, meeting the needs and aspirations of building users.
MLO2	2	Synthesise the creative application of art, cultural, environmental or other work to architectural design projects, in terms of their conceptualisation and representation.
MLO3	3	Demonstrate the testing of architectural ideas within their urban context from initial building proposal through to final contextual design.
MLO4	4	Propose sustainable environmental strategies based on research and analysis of exemplary precedents.
MLO5	5	Prepare and present an architectural design project that assimilates a concept using a range of media in response to a brief.

Module Content

Outline Syllabus	In this module students will work individually to develop detailed proposals for the design of a building; the site of each students' building is to be taken from a previously proposed urban design masterplan. Students will consider how the building contributes to a coherent public realm and how people will use the building. Detailed proposals for the building will address issues such as: sustainability, environmental design, materials selection and water.
Module Overview	
Additional Information	This module develops the urban design strategy (5121ARC) into a building design proposal for a key site within the strategy. Module outputs will demonstrate the design proposal both spatially and technically within the urban context.

Assessments

Assignment Category	Assessment Name	Weight	Exam/Test Length (hours)	Module Learning Outcome Mapping
Artefacts	Artefact	100	0	MLO1, MLO2, MLO3, MLO4, MLO5
