Learning Outcomes

Code	Number	Description
MLO1	1	Demonstrate understanding of a range of concepts and empirical evidence in developmental, individual differences, and social psychology with reference to historical and contemporary perspectives.
MLO2	2	Critically discuss key stages in developmental processes, including the development of cognitive, emotional and social skills through the life span
MLO3	3	Critically discuss key concepts related to social psychology and individual differences

Module Content

Outline Syllabus	The module will explore psychological development through the life span, covering key areas of development such as cognitive development, identity development and developmental disorders. The module will cover key concepts from individual differences research; for example, intelligence, gender commonalities and differences, personality and subjective wellbeing. Students will also gain an understanding of social psychological concepts such as interpersonal relationships, group processes and intergroup relations.
Module Overview	In this module you will explore psychological development through the life span, covering key areas of development such as cognitive development, identity development and developmental disorders. The module will cover key concepts from individual differences research: intelligence, gender commonalities and differences, and personality and subjective wellbeing. You will also gain an understanding of social psychological concepts such as interpersonal relationships, group processes and intergroup relations.
Additional Information	Three core aspects of Psychology are covered in this module: Development, Individual Differences, and Social Psychology.
