Programming and managing changes in accommodation
Practices and emerging trends of using building space
Design solutions for planning fit-outs.
Ergonomics
Interpretation of diagrams and drawings
Sustainability, environmental management and corporate social responsibility
Knowledge and information management of workspace
Entrepreneurship

Learning Activities

Lectures are used in order to identify and explain key concepts and theories and provide detailed information on particular subject areas within the module. They help to stimulate the student's interest in the subject area. Lectures may also include guest industry speakers to add industry context to the material.

Workshops are used to engage students in more intensive discussion and activity on particular subject areas within the module. This helps shape the student's own understanding and place the lecture material in context.

Notes

Space utilisation is a key issue that many facilities managers have to grapple with. This module investigates the challenges of managing and utilising space within

different buildings and premises. The module also focuses on the concept of entrepreneurship as a valuable learning and development tool.
