Notes

This is the first module to be undertaken in this programme and so will enable the student to become familiar with the learning environment and resources available to them. During this module the students will be introduced to a range of study skills and encouraged to utilize the VLE(Blackboard). Development of skills in critical

reading, writing , IT, oral and written presentation will enable the student in their academic progression. The range of assessment tasks in this module are designed to stretch the student and be of benefit later in the programme.
