Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	AS1	Assignment of 4000 words.	100	

Aims

The module aims to expose students to the concepts of clinical governance. From this they will be able to clarify their thinking and accept appropriate responsibility for its implementation.

Learning Outcomes

After completing the module the student should be able to:

- 1 Discuss how high quality clinical care is best provided in the context of perioperative practice.
- 2 Examine quality initiatives already established within their service areas.
- 3 Analyse the benefits of current quality assurance systems within their own area of work and consider developments needed.
- 4 Discuss the responsibilities of both the organisation and the individual in ensuring safe, high quality patient care

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Essay	1	2	3	4
-------	---	---	---	---

Outline Syllabus

Responsibility and accountability.

The nature of clinical care.

Quality assurance strategies-e.g. clinical audit, clinical guidelines, standard setting, protocols.

Clinical Effectiveness and evidence based practice.

Organisational design.

Use of data collection systems.

Infection control

Perioperative roles

The perioperative environment

General anaesthesia

Surgical specialties

Sterilization and disinfection

Learning Activities

There will be a series of lectures followed by tutorials, and seminars.

Group work activity.

Notes

This module will enable the students to explore issues of quality and risk governance. It will consider the key concepts contained within the area of clinical governance and determine the ways in which they can be addressed.
