Aims

To provide students with an opportunity to develop an understanding of the different types of dementia.

To allow students to demonstrate an awareness of the support networks available.

To allow students to demonstrate an understanding of person centred care

strategies.

Learning Outcomes

After completing the module the student should be able to:

LO1   Identify the signs and symptoms of the three main types of dementia
LO2   Demonstrate an ability to access relevant support networks for service users and carers.
LO3   Demonstrate awareness of challenging behaviours and the management strategies
LO4   Demonstrate an ability to communicate effectively with dementia suffers
LO5   Demonstrate awareness of the concepts of person centre care strategies

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

CW1   LO1   LO2   LO3

CW2   LO4   LO5

Outline Syllabus

This module will provide students with an overview of the different types of dementia, the support networks available, communication techniques and the management of challenging behaviours.

It will also give students and insight into person centred care strategies that can be used within their work settings.

Learning Activities

By a series of lectures, tutorials, practical work and private study.

Notes

This module will offer an opportunity to examine in some depth the various types of dementia and how society can and must respond to the growing needs of this particular client group. It seeks to evaluate strategies applied in practice and raise awareness of the various support networks available. Regular tutorials will provide opportunities for informal formative assessment to support student learning and discuss their overall progress.
