Practice	practice	practice assessment	40	

Competency	Practice
------------	----------

Aims

To provide the student with opportunities to broaden existing knowledge and clinical skills within a negotiated specialised area of perioperative practice

Learning Outcomes

After completing the module the student should be able to:

- 1 Demonstrate the ability to transfer and apply existing knowledge and skills into a specialised area of perioperative practice
- 2 Appraise and apply the concepts of risk assessment and risk management to practice
- 3 Apply existing knowledge of legal and ethical issues to perioperative practice
- 4 Analyse personal development needs and engage in reflection on learning in the context of the practice setting

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Exam	1	3		
Log book	1			
Practice	1	2	3	4

Outline Syllabus

Application of specialised perioperative practice skills specific to the area of specialisation for the placement

Learning Activities

Student centred approach to learning in the clinical field
Action planning and learning agreements
Experiential learning
Tripartite meetings, normally no less than 2 within the duration of the module
Clinically based tutorial sessions with medical professionals, nursing specialists, specialist Trained Theatre Technicians.
Portfolio generation

Skills workshops using simulation in the skills lab

Notes

This module intends to further the student's basic knowledge and skills and to transfer these into a negotiated area of specialised perioperative practice.

The portfolio of competency must attain a pass grade and assesses all learning outcomes.

A log book, as specified by Malaysian Nursing Board, forms part of the summative assessment for this module
