Title: Electrical Engineering Practice 2
Status: Definitive
Code: **5506USST** (126465)
Version Start Date: 01-08-2021

Owning School/Faculty: Engineering
Teaching School/Faculty: University of Shanghai For Science and Technology

Team	Leader
Mahamoud Ahmed	Y

Academic Level: FHEQ5 **Credit Value:** 20 **Total Delivered Hours:** 72
Total Learning Hours: 200 **Private Study:** 128

Delivery Options

Course typically offered: Semester 2

Component	Contact Hours
Lecture	24
Practical	36
Tutorial	12

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Portfolio	AS1	Project Development	60	
Report	AS2	Individual literature review and project plan	40	

Aims

To enable students to develop the skills required to practice as a professional engineer. This module provides a broad range of experiences with an emphasis upon the systematic thinking, planning and execution required of engineers in a modern professional environment. The students will be required to design build and

test an electronic product to a given specification. The product will incorporate elements covered elsewhere on the course, including analogue electronics and a programmable device such as a microcontroller or FPGA.

Learning Outcomes

After completing the module the student should be able to:

- 1 Design, build and test an electronic product to a given specification.
- 2 Demonstrate commitment to conduct engineering activities in a professional manner.
- 3 Critically appraise and research a topic, find relevant literature and produce a critical review.
- 4 Appraise and apply the principles of effective project management to the allocation of tasks and resources.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Project Development	1	2
Lit Review/project plan	3	4

Outline Syllabus

The list below provides an indicative list of topics which may be covered in this module:

Experimental Practice

- *Complete a set of laboratory experiments*
- *Observation, measurement and recording of experimental results*
- *Data handling*
- *Presenting and reporting of results*

Professional Development

- *Careersmart programme*
- *Health & Safety*
- *Ethics*
- *Institutional Code of Conduct*

Research Methods

- *Research & Library Skills*
- *Report Writing*

- *Critical Thinking*

Engineering Management

- *Project Planning*
- *Project Management*

Learning Activities

Students will be split into two groups and undertake a supervised laboratory sessions every fortnight, lectures and tutorials will take place in the weeks between lab sessions.

Notes

Students must complete the assessment exercises to a satisfactory standard in order to achieve a pass grade in this module.
