

Information Systems Development

Module Information

2022.01, Approved

Summary Information

| Module Code | 5513CSMM | |
|---------------------|----------------------------------|--|
| Formal Module Title | Information Systems Development | |
| Owning School | Computer Science and Mathematics | |
| Career | Undergraduate | |
| Credits | 20 | |
| Academic level | FHEQ Level 5 | |
| Grading Schema | 40 | |

Teaching Responsibility

LJMU Schools involved in Delivery

LJMU Partner Taught

Partner Teaching Institution

Institution Name
Auston College Myanmar, Yangon, Myanmar

Learning Methods

| Learning Method Type | Hours |
|----------------------|-------|
| Lecture | 22 |
| Tutorial | 22 |

Module Offering(s)

| Display Name | Location | Start Month | Duration Number Duration Unit |
|--------------|----------|-------------|-------------------------------|
| APR-PAR | PAR | April | 12 Weeks |
| JAN-PAR | PAR | January | 12 Weeks |

| SEP-PAR | PAR | September | 12 Weeks | |
|---------|-----|-----------|----------|--|
|---------|-----|-----------|----------|--|

Aims and Outcomes

| Aims | To provide an understanding of the underlying principles of systems analysis and design |
|---------|---|
| 7 dillo | |

After completing the module the student should be able to:

Learning Outcomes

| Code | Number | Description |
|------|--------|---|
| MLO1 | 1 | Apply the underlying principles of systems analysis and design. |
| MLO2 | 2 | Apply different systems analysis and design methodologies |
| MLO3 | 3 | Differentiate between the logical and physical design process. |
| MLO4 | 4 | Apply the concepts of object orientation within software systems analysis and design. |

Module Content

| Outline Syllabus | Process overview: Traditional and contemporary systems development lifecycles and management including waterfall, prototyping and agile approaches such as DSDM. Preanalysis phase: Investigation, information gathering, feasibility studies. Analysis phase: Requirements capture, prototyping, analysis and specification (structured techniques such as DFDs, ERM; object-oriented techniques such as UML use cases, activity diagrams and class diagrams). Object-oriented analysis and design.Logical design, Physical design, Architectural design (component diagrams, deployment diagrams); Usability issues: HCl and prototyping. Post implementation phases: System testing, installation, training and maintenance |
|------------------------|--|
| Module Overview | |
| Additional Information | This module explores the theories and practical application of systems analysis and design techniques with particular emphasis on object-oriented analysis and design and its role in software development. |

Assessments

| Assignment Category | Assessment Name | Weight | Exam/Test Length (hours) | Module Learning Outcome Mapping |
|---------------------|-----------------|--------|--------------------------|------------------------------------|
| Report | Report | 100 | 0 | MLO1, MLO2, MLO3, MLO4 |
