Aims

To enable students to apply the knowledge gained from Level 5 modules to a suitable industry derived project and to facilitate self-learning through personal development planning.

Learning Outcomes

After completing the module the student should be able to:

- 1 Reflect upon their developmental learning performance and/or achievement and to plan for their personal, educational and career development.
- 2 Apply and evaluate built environment principles and techniques to an industry related project.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

PORTFOLIO 1	2	
PORTFOLIO 2	1	2

Outline Syllabus

Within the module itself the following areas will be considered and applied to an industry specific project: BIM processes, negotiation skills, sustainable design, cost, programme, procurement and legal considerations.

Transferable skills will be developed during the undertaking of the project and progress mapped.

Learning Activities

Lectures, workshops, group work and presentations

Notes

The central theme of the module is to facilitate group working and the production of industry standard project documentation.
