Risk, skill transference, intellectual property and contractual matters including arbitration processes, approaches to litigation and contract termination and ceasing commercial relationships
The various types and models of communication used in managing relationships with suppliers and specialists.
Establishing and measuring standards of supplier performance and best value

Learning Activities

Lectures are used in order to identify and explain key concepts and theories and provide detailed information on particular subject areas within the module. They help to stimulate the student's interest in the subject area. Lectures may also include guest industry speakers to add industry context to the material.

Workshops are used to engage students in more intensive discussion and activity on

particular subject areas within the module. This helps shape the student's own understanding and place the lecture material in context.

Notes

This module helps students appreciate the complexities of managing and administering contracts within the property and construction industry. It focuses on the administration and management of contracts, as well as exploring the different procurement strategies organisations may have.
