

Summary Information

Module Code	5619YCOM
Formal Module Title	Information Assurance
Owning School	Computer Science and Mathematics
Career	Undergraduate
Credits	20
Academic level	FHEQ Level 5
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
LJMU Partner Taught

Partner Teaching Institution

Institution Name
YPC International College (Kolej Antarabangsa YPC)

Learning Methods

Learning Method Type	Hours
Lecture	22
Practical	11
Tutorial	22

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
JAN-PAR	PAR	January	12 Weeks

Aims and Outcomes

Aims	To provide a detailed understanding of the main concepts of Information Assurance. To develop an appreciation of the process of information security management, including risk analysis, control analysis and post-event security. To develop an awareness of the standards relating to information assurance within enterprise environments, including legal and compliance issues.
------	---

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Analyse security risks associated with a computer system using a standard methodology
MLO2	2	Interpret legal, governance and compliance issues for information assurance
MLO3	3	Identify success factors in information security management

Module Content

Outline Syllabus	Concepts in Information Assurance; threats, vulnerabilities, attacks, models for discussing security, situational awareness, economic and business constraints, technology controls, human factors, ethics, 'cyber'. Risk Assessment; understanding risk factors, methods for risk assessment, standards including USA NIST and UK CIESG. Information Security Management: governance and compliance, 'Quality' and the need for audit, standards including PCI-DSS and ISO 27001. Law: cyber-crime and related laws including CMA, DPA, RIPA. Related issues around 'conflicts' of privacy and free-speech. Post-event Security: attacks, incident response, disaster recovery, forensics and involvement of law enforcement.
Module Overview	
Additional Information	The term Information Assurance generally refers to the wide range of activities that information security practitioners engage in, although typically excludes the actual development of solutions through software development. In this module the focus is on the analysis, management and information governance aspects of being an IA practitioner.

Assessments

Assignment Category	Assessment Name	Weight	Exam/Test Length (hours)	Module Learning Outcome Mapping
Report	Security Analysis	40	0	MLO1
Exam	Examination	60	2	MLO2, MLO3
