Aims and Outcomes

Aims	The aims of this module are for students to develop a broad understanding of sustainability, appreciate how the world's current sustainability challenges are affecting and are affected by business and to be able to competently discuss topics across a wide range of disciplines including business, economics, social issues and ecology. It will enable students to make informed decisions that incorporate ethical, environmental and responsible dimensions into management thinking - particularly strategic decision making.
------	---

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Evaluate the processes that shape the natural world and their influence on and by human activities.
MLO2	2	Examine current trends and a range of data related to business and its interaction with the environment, society and the economy.
MLO3	3	Analyse and apply appropriate methods for putting sustainability into practice and then outline a strategy for organisational change towards a sustainability approach.
