MLO5	5	Reflect on the process of doing the study and discuss its limitations.

Module Content

Outline Syllabus	Introducing the dissertation Writing aims and outcomes Thinking through ethical issues Using secondary sources Choosing and justifying a methodology Data analysis Writing your dissertation
Module Overview	This module aims to engage you in student-negotiated academic activity, requiring creativity, self-motivation and the ability to draw on the knowledge and skills developed in other modules. The dissertation permits you to engage in a major project of your choice. It supports you while you investigate a specific environmental health issue, or set of issues, through individual study, using either the literature and relevant secondary sources, or empirical methods.
Additional Information	The dissertation permits students to engage in a major project of their choice. It supports students while they investigate a specific environmental health issue, or set of issues, through individual study, using either the literature and relevant secondary sources, or empirical methods.
