------------	----------

Aims

The aim of this module is to develop, support and prepare nursing students be able

to work safely and competently whilst undertaking more complex practice learning opportunities.

Learning Outcomes

After completing the module the student should be able to:

- 1 Demonstrate achievement of Domain One NMC Professional Values within the Practice Assessment Record.
- 2 Demonstrate application of numeracy in regards to medicines management and drug calculations in Adult Practice

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Practice Assessment Record	1	
Numeracy Exam	2	
Practice	1	2

Outline Syllabus

Manual handling, CPR, central lines/PICC line management, Advanced COPD and spirometry, sepsis, blood gases, Oxygen saturations IV devices, assessment of deteriorating patient, ABCDE assessment reviewed, DKA and HONK, advanced respiratory assessment. 3 lead ECG's, cardiac A/P revisited. Tracheostomy care. Psychological care of the acutely unwell patient. Care of the dying patient.

Learning Activities

A range of learning activities will be used for module delivery complementing practice experience, including lectures, simulation and workshops, online learning, reflective practice, guided reading and independent study.

Notes

This module will develop and enhance clinical competencies, building on previous practice modules and practice experience. Students will be encouraged to extend their knowledge on more complex clinical practice whilst becoming more autonomous and addressing areas for further development in preparation for their final sign-off placement in 6001BANSAD.

The Practice assessment Record (Domain 1 only) and the numeracy assessment must both be passed to successfully complete this module.
