Learning Activities

A range of learning activities will be used for module delivery including lectures, activity-based seminars and workshops, on-line learning, reflective practice, formative assessment, guided reading and independent study.

Notes

This module will offer opportunities for students to act in a competent and autonomous manner in clinical placements in preparation for registration. It aims to further extend the student's generic and field knowledge and skills through undertaking a range of basic and complex practice learning opportunities. Students will work with less direct supervision to make the most of opportunities to extend knowledge, skills and practice. Practice learning is supported by a formative skills inventory. University-based skill development will focus on complex and advanced skills to prepare students for this level of practice-based learning
