Aims

The aim of this module is to develop, support and prepare students be able to work safely and competently whilst undertaking more complex practice learning opportunities.

Learning Outcomes

After completing the module the student should be able to:

- 1 Effectively and safely achieve all practice based learning competencies.
- 2 Demonstrate competent, safe and effective practice by the point of registration.

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Practice Achievement	1	2
Record		
Practice		

Outline Syllabus

CPAP/BIPAP, conflict management, airway management, acute and chronic renal failure, complex patient assessment, neurological assessment, abdominal assessment, shock (all forms), skin and wound management. Pharmacology in acute care, Hypertension, Dementia/stroke. Pneumonia/chest infections Communication skills SBAR, Liver/diagnostics. Care, compassion and accountability. Advanced care planning.

Learning Activities

A range of learning activities will be used for module delivery, including lectures, simulation and workshops, online learning, reflective practice, guided reading and independent study.

Notes

This module will develop and enhance clinical competencies, building on previous practice modules and practice experience. Students will be encouraged to extend their knowledge on more complex clinical practice whilst becoming more autonomous and addressing areas for further development in preparation for final 6months.
