Learning Activities

The module will be delivered through a combination of interactive lectures, which will be used as resource sessions for students, discussions, group tutorials, private study and clinical practice.

These will be supplemented by appropriate ICT to facilitate communication and learning

The students will also be required to showcase their clinical learning as applied to discussions on healthcare subjects

Notes

The module is designed to provide critical insight into the current state of healthcare. It will introduce a variety of improvement strategies currently employed by high performing organisations. The module will enable students to explore issues in the context of nursing and developments of contemporary practice. These have a profound effect on patients and service users/carers and must be addressed by the practitioners of tomorrow
