Learning Activities

The module will be delivered through a combination of interactive lectures, which will be used as resource sessions for students, discussions, group tutorials, private study & practice. The delivery methods are designed to foster practical skills of reflection These will be supplemented by appropriate ICT to facilitate communication and learning.

The students will also be required to obtain information from the workplace to discuss change management within healthcare environments

Notes

The module is designed to provide critical insight into the current state of health care. It will introduce a variety of improvement strategies currently being employed by high-performing organizations. The module will enable students to explore issues in the context nursing and developments of contemporary nursing practice. These have a profound effect on patients and service users/carers and must be addressed by the practitioners of tomorrow.
