

Liverpool John Moores University

Title: WOUND MANAGEMENT: ADVANCING PRACTICE
Status: Definitive
Code: **6070PQHEAL** (112406)
Version Start Date: 01-08-2021

Owning School/Faculty: Nursing and Allied Health
Teaching School/Faculty: Nursing and Allied Health

Team	Leader
Laura Kinsey	Y

Academic Level: FHEQ6 **Credit Value:** 15 **Total Delivered Hours:** 30

Total Learning Hours: 150 **Private Study:** 120

Delivery Options

Course typically offered: Runs Twice - S1 & S2

Component	Contact Hours
Lecture	10
Seminar	10
Tutorial	10

Grading Basis: 40 %

Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Essay	Essay	Coursework: An Evaluative report of a development they have introduced in the clinical area (3000 words) and Clinical Learning Agreement	100	

Aims

This module will provide the student with an understanding of the key issues that are driving developments in wound management in order to advance practice.

Learning Outcomes

After completing the module the student should be able to:

- 1 Critically explore the important factors required for the holistic assessment of acute and chronic wounds (KSF 1,3,5,6).
- 2 Critically review interactive and conventional wound care products (KSF 2).
- 3 Evaluate current evidence related to wound care and determine its applicability in the clinical area (KSF 4,5).
- 4 Demonstrate the ability to facilitate change in wound management in your clinical area (KSF 1,2,4).

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Essay	1	2	3	4
-------	---	---	---	---

Outline Syllabus

Reflective practice.

The evolution of contemporary wound dressings.

Holistic assessment of wounds.

Comparative treatments for wounds.

Professional judgment for decision - making.

The patient's journey

Wound care across the age spectrum

Patient focused care

The management of necrotic, sloughy and granulating wounds.

Lotions used in wound care.

The effects of antiseptics and anti-microbials on wound healing.

Multi disciplinary roles in tissue viability.

Advanced care and holistic management of chronic wounds (pressure sores, leg ulcers, ischaemic and fungating lesions)

Advanced care and holistic management of acute wounds.

Ethical and legal issues in tissue viability.

Application of change theory.

Monitoring and clinical audit of tissue viability.

Future developments for the optimum wound dressing.

Learning Activities

Lectures, clinical Workshops, seminars, individual tutorials.

Activities are dependant on the individual needs of the student, as identified in the module learning outcomes. 30 hours clinical practice would be expected as part of private study time.

Notes

This module provides students with a critical understanding of wound management and enables them to improve an area of practice in their own clinical environment
