Presentation	1	2	3	4

Outline Syllabus

Generating research aims and objectives; Deconstructing the dissertation; Critiquing research evidence; Ethical considerations in research; Designing valid and reliable methodological approaches; Refinement of data collection tools; Data analysis; Presentation of results; Discussing and concluding research

Learning Activities

Many of the elements of this module will be explored in Lectures, Seminars and ICT software demonstrations. Students will be offered individual consultations and tutorials.

Notes

This module will enable students to discover issues surrounding the conducting of research related fields relevant to the programme of study. The module will demand that students design and conduct a substantial piece of research in an appropriate topic area. Students will present both a written thesis and also a verbal presentation of their research project. In addition to this, students will be required to defend their dissertation in viva-voce examination.
