Aims

The module aims to apply student's skills and knowledge to work in applied practice

through a programme sourced group placement and supervision processes akin to that of professional training. The module is primarily delivered through placement activity and supervision seminars and will allow the student to develop group working skills, product development related to applied sport psychology practice and develop reflective narrative skills.

Learning Outcomes

After completing the module the student should be able to:

- 1 Design an effective group based product appropriate to that set for the placement and client group
- 2 Critically appraise the design, delivery and impact of the applied sport psychology provision for the client group
- 3 Demonstrate ability to reflect on placement experience, skills and knowledge relevant to applied sport psychology practice

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Group product	1	
Product critique and narrative	2	3

Outline Syllabus

This module is designed to provide students with the opportunity to apply and develop their theoretical knowledge and applied practice skills by engaging in a group work related learning project. Learning/activity will be structured through a group learning agreement, placement activity, supervision tutorials and evaluated by the completion of a group and an individual assessment tasks. This module places significant emphasis on group tutorials with the academic placement supervisor to facilitate the student learning experience. This module contributes to the development of graduate teamwork / interpersonal and communication skills.

Learning Activities

Students are expected to attend the time-tabled lecture and are encouraged to utilise the available directed learning / private study time to get advice from university placement tutor/ placement provider and/or conduct essential reading. Within the University Placement Tutor (UPT; this is the supervisor of the placement) supervision sessions students will be required to use their reflective, analytical and problem-solving skills to enhance their own learning. Students should complete required and recommended reading to widen their knowledge and understanding and their ability to critically evaluate and material. Students will be required to evidence these skills through the assessment tasks.

Notes

Students will engage in a group placement under supervision from staff who have expertise in such settings. Students who have not completed the PP01 form (this a flow-diagram audit check-list that will guide you the student through the process) in semester one via 6101SPOPSY will not be eligible to undertake a placement. Placements will be available across a variety of setting and supervision will be akin to that of professional training frameworks.
