Aims and Outcomes

Aims	To equip the student with the necessary transferable skills to investigate a research topic and present their findings in both written and oral forms.
-------------	--

Learning Outcomes

After completing the module the student should be able to:

Code	Description
MLO1	Critically analyse literature pertinent to the project with appropriate use of citations and Harvard referencing.
MLO2	Demonstrate an understanding of and critically evaluate methods of research appropriate to the project and propose future work.
MLO3	Analyse, interpret and present research results in both written and oral forms.

MLO4	Demonstrate a range of employability skills including time management, initiative and problem solving.
------	--

Module Content

Outline Syllabus

Students will be allowed to choose a subject area from within the field of forensic science, and the project itself will then be developed by the student in discussion with their allocated project supervisor.

Module Overview

Additional Information

This course will introduce the student to a research philosophy by providing training and assessment in areas including: use of literature, research skills, experimental design and project planning/budgeting, risk assessment and ethical issues, analysing and solving problems, oral communication, report writing, self-management and personal development planning.
