Research for Specialist Practice

Module Information

2022.01, Approved

Summary Information

Module Code	6147PCCOMM
Formal Module Title	Research for Specialist Practice
Owning School	Nursing and Allied Health
Career	Undergraduate
Credits	20
Academic level	FHEQ Level 6
Grading Schema	40

Teaching Responsibility

LJMU Schools involved in Delivery
Nursing and Allied Health

Learning Methods

Learning Method Type	Hours
Lecture	30
Seminar	8
Tutorial	2

Module Offering(s)

Display Name	Location	Start Month	Duration Number Duration Unit
SEP-CTY	CTY	September	12 Weeks

Aims and Outcomes

Aims	1. To enable the students to examine a variety of research methods, used within the sphere of health and social care practice and development.2. To enable the students to develop skills in critical evaluation of literature available within the field of health and social care development and clinical management.

After completing the module the student should be able to:

Learning Outcomes

Code	Number	Description
MLO1	1	Critically analyse the significance of research questions in determining research design.
MLO2	2	Critically examine the research process in quantitative and qualitative methodologies.
MLO3	3	Critically reflect upon the suitability of research methods utilised within health and social care context.
MLO4	4	Evaluate research literature in health and social care development and clinical management.

Module Content

Outline Syllabus	1. Approaches to research. The research process.2. Quantitative designs and methods. Types of data collection in quantitative research. Types of analysis of quantitative data. Components of critical appraisal in quantitative research.3.Qualitative methods. Introduction to phenomenology, ethnography, grounded theory, naturalistic inquiry. Types of data collection methods in qualitative research. Elements of critical appraisal in qualitative research.4. Barriers to research implementation and dissemination.5. Protection of research participants. Ethical issues in research.
Module Overview	This module seeks to provide clinicians with an overview and understanding of a broad range of qualitative and quantitative research methodologies and their application in the clinical and social care environment, enabling you to read, understand and critically analyse clinical and social care research literature.
Additional Information	This module seeks to provide clinicians with an overview and understanding of a broad range of qualitative and quantitative research methodologies and their application in the clinical and social care environment, enabling them to read, understand and critically analyse clinical and social care research literature.

Assessments
