Assessment Details

Category	Short Description	Description	Weighting (%)	Exam Duration
Dissertation	Disser	6000 Word Dissertation	85	
Report	Proposal	1500 Word Research Proposal	15	

Aims

This module aims to allow students to develop and independently apply their empirical research skills in their chosen area of psychology. They will explore, in depth, recent and relevant literature in their chosen field and use it to guide the design of a methodologically appropriate study to address a specific research question. They will independently analyse, report and critically evaluate

their data using scientific language and conventions.

Learning Outcomes

After completing the module the student should be able to:

- 1 Critique recent and relevant literature within a theoretical context.
- 2 Develop appropriate questions independently based on a critical review of recent and relevant literature.
- 3 Critically select appropriate methodology to address the research questions.
- 4 Critically appraise ethical issues in the procedure of the empirical study.
- 5 independently interpret and evaluate empirical data with reference to the research questions

Learning Outcomes of Assessments

The assessment item list is assessed via the learning outcomes listed:

Dissertation	1	4	5	
Proposal	1	2	3	4

Outline Syllabus

The student devises and conducts a research project under supervision. The student attends a lecture in semester two of the year preceding registration for an introduction to the module. The student attends two lectures in semester one of the year of registration covering assessment issues, ethical issues and literature searching skills.

Learning Activities

Attend lectures
Meet regularly with supervisor
Conduct a literature search
Draw up a research plan with a realistic time scale.
Conduct and write-up research project.
Complete application for ethical approval of dissertation work and submit it to a recognised research ethics committee or panel.

Notes

This is a core module for students as the psychology programme

Students carry out an empirical investigation into a psychological area of their choice. Students will be expected to meet with their supervisor for up to 15 hours maximum of tutorials over the course of the module arranged by mutual agreement.

Students will have opportunity to obtain feedback about the strengths and weaknesses of a draft copy of their dissertation report if they submit it by the agreed deadline.
